DETAILED ACTION

1. Applicant's cancellation of claims 1-101 and addition of new claims 102-116 is acknowledged. Claims 102-116 are pending.
2. Applicant's election of invention VII is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 102-116 are under examination.

Claim Objections

3. Claims 112 and 114 are objected to because of the following informalities: the claims recite specific mutants using nomenclature defined in the specification by SEQ ID NO. Because the nomenclature is not consistently used throughout the specification, Applicant should define the specific mutants by SEQ ID NO in the claims. For instance, claim 114 recites the H14D9 mutant whereas Table 1 references the mutant as 14D9. For the sake of clarity, appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 103-110 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 103-110 are indefinite as the claims recite changes to an amino acid sequence at specific positions without providing a reference SEQ ID NO. For examination purposes, SEQ ID NO: 2 has been used as the reference sequence.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 102-107, 109, 111, 113, 115 and 116 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsein *et al.* (5,625,048). Tsein *et al.* teach mutant GFP of *Aequora victoria* that displays alterations in the emission spectra with changes in the pH, especially when the protein is denatured above pH 10 (see column 4). Tsein *et al.* teach GFP mutants where positions 167, 202, and 203 have been mutated (see Table 1). Tsein *et al.* specifically teach the I167V mutant. Fusion proteins are also taught (see column 6 and claims). The GFP of Tsein *et al.* possess a Ile at position 161. +Thus, the reference clearly anticipates the invention as recited in the claims.

Conclusion

6. Claims 108, 110, 112, and 114 are free of the prior art.
